COOPERATIVE CORPORATION**

DSM – Commercial & Industrial Thermostat Program

Purpose

The Commercial & Industrial Thermostat Program is an energy efficiency initiative designed to encourage commercial and industrial members to reduce energy usage by upgrading to self-learning thermostats.

Availability

This program is available to non-residential members within the service territory of Farmers Rural Electric Cooperative Corporation (“Farmers RECC”).

Eligibility

Members are eligible for this program if they have a ducted air-source air conditioner or heat pump with a capacity of 2 tons or greater, controlled by a single thermostat that is non-self-learning. An incentive is available for each single-zone system where a self-learning thermostat is installed. Zoned systems are not eligible for this incentive.

Notwithstanding the forgoing, a landlord who rents to a tenant who is a member of Farmers RECC shall also be eligible to participate in the Commercial & Industrial Thermostat Program regardless of whether said landlord is also a member of Farmers RECC. A landlord may be eligible for the same number of incentives per calendar year as a metered tenant member.

Verification Procedure

To qualify for the incentive, existing non-self-learning thermostats must be identified or documented by EKPC or Farmers RECC staff before the retrofit. After the member completes the retrofit, EKPC or Farmers RECC staff must verify the installation of thermostat.

Payment

For each qualifying thermostat that is replaced with a self-learning thermostat, the member will receive an incentive of \$100.

Term

The Commercial & Industrial Thermostat Program is an ongoing program.
